

SerixOnline

- Your Ordering Portal for an easier
ordering procedure

Serix Online

- Your customized ordering portal for all needs

Serix Online is your ordering portal that is open when you have time, around the clock, every day of the year. In the ordering portal, you can order all different types of credentials, such as Foto-ID cards, key fobs, access card and accessories.

As a customer, you can follow the entire process from order to delivery. There is also the possibility of an attest function where orders must be approved by an authorized person before proceeding to production. Production takes place with redundancy at our office in Stockholm there we annually produce around 5 million credentials with accessories.

The order portal also offers rereading of chip numbers to simplify adding of chip numbers in e.g. access control system. For those customers who want to integrate card ordering from their own system, there is a modern API that offers all the features found in the web portal. If you are a reseller, you can manage your own customers by profiling the portal as your own and administer your customers products and prices.

Serix Online has proven to be a success as we today have over 5000 users using this service to place their orders. You can do a test to order of a free test card by scanning the QR code.

Option for secure login with BankID!

Instant Issuance

A part of Serix Online

Local production of access and photo ID cards

Streamlined and simplified production of your access cards!

Whether we produce your cards centrally or you handle it locally, you maintain full control over the process - all through a single interface. With Instant Issuance, you get a flexible, cost-effective solution that requires no upfront investment.

Our "All-Inclusive" concept covers everything: features, support, and design.

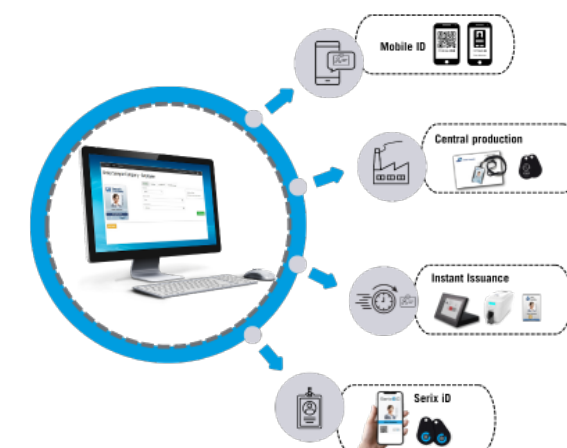

Naturally, we offer a secure solution for data transfer to the Print Console, with no need for installation within your IT environment.

All data is deleted locally immediately after the card is printed, ensuring both security and efficiency. When printing photo ID cards, you can easily encode and encrypt RFID cards for added security.

Getting started is easy:

1. We upload your card layouts to our online portal.
2. The Print Console is configured and delivered with a printer or connected to your existing one.
3. Connect to your Guest-Wi-Fi, plug in the power cable—and you're ready to go!

In just a few minutes, you'll be set to print your own cards with a solution that combines maximum convenience, security, and flexibility.
