

## Serix Online - A portal for all needs

**Serix Online is your ordering portal that is open when you have time, around the clock, every day of the year. In the ordering portal, you can order all different types of identity cards such as photocard, key fobs, access cards and accessories.**

As a customer, you can follow the entire process from order to delivery. There is also the possibility of an attest function where orders must be approved by an authorized person before proceeding to production. Production takes place with redundancy both at our office in Stockholm and in Ronneby there we annually produce around 4 million credentials with accessories.

Possibility of secure login with BankID.

The order portal also offers rereading of chip numbers to simplify adding of chip numbers in e.g. access control system. For those customers who want to integrate card ordering from their own system, there is a modern API that offers all the features found in the web portal. If you are a reseller, you can manage your own customers by profiling the portal as your own and administer your customers products and prices.

Serix Online has proven to be a success as we today have over 40,000 users using this service to place their orders. You can do a test to order of a free test card by scanning the QR code.

**Order a free test card!**
