

# Terminals

**What is a terminal? A terminal is a computer that is adapted for data input and for presenting data. In addition to the computer, a keyboard or other data input device is often included along with a screen or touch screen. With us, you will find everything from a self-enrollment terminal, to different types of photo stations in several sizes and designs.**

Below, you will see some examples of our terminals. They are available in various designs and are the obvious complement when, for example, you create your reception environment. The terminals can be used for different occasions such as self service, where the visitor registers him or herself on arrival, or taking pictures when you need pictures on all your staff in a simple and flexible way. Feel free to contact us if you have any questions or want more information about our products. We help you find a terminal that suits your needs!

## All-In-One PC with touch screen

An elegant, compact and easy-to-install tablet computer with touch screen that is ideal to apply to our visitor system. Can be installed on both a wall or reception desk and can be ordered in the colors black and white.

Description	Part No.
All-In-One PC with touch screen - Black	70188
All-In-One PC with touch screen - White	70189

## Self-service terminal

On arrival, the visitor shows the QR code to a reader with their mobile phone and is automatically checked in at the same time as a visitor label is printed and cut off with the built-in scissors. In the meantime, the recipient of the visit will be notified via a text message and/or email. In this way, both reception staff and pre-booked visitors avoid having to register manually upon arrival. We have developed this solution to meet the market's demand for self-service services and it has become a great success!

Description	Part No.
Self-service terminal - White	70034
Self-service terminal - Black	70035

## Service station

Service station is the ultimate unit for self-service and has its designated place for the administration of all types of identity cards, such as Company ID or student identification. The construction is very robust and is designed for daily use in public environments such as schools and universities. It is also equipped with several communication interfaces, is height-adjustable and is usually connected to the Internet or intranet. This makes it possible to also use the station as a terminal or information kiosk.

Terminal Reglerbar with touch screen + keyboard - Black/Silver	70069

## Photostation Express

Seriline offers a simple all-in-one solution where the person can photograph themselves for their new card. The Express photo station is a portable solution that can be advantageously placed in a temporary location for staff photography. It can be placed on a table or, for a more permanent solution hung on a wall. The photo station has a built-in lighting to be able to take photos with good quality. The flow is simple, intuitive and can be tailored specifically for your organization.
